

## Preparation

If you decide to stay abroad, please note that you have to start with the preparation (organisation, language skills) in good time, e.g. for a semester abroad at a partner university at least one year in advance.

The International Office as well as the Coordinator Internationalisation Dept. B+W are more than happy to assist you with the organisation of your stay abroad.

In addition, please visit the website of the [International Office](#) for further information about the preparation. The information relates to study semesters at a partner university, but in many cases also apply to self-organized study semesters or internships abroad.
